

INSTRUCTIONS FOR REMOVING THE OVERLAP (PHOTOMURALS)

Necessary Materials

The photomural: All the pannels already hanged and well overlapped. For this you must follow carefully the instructions for hanging the murals.

A ruler: To be able to realize a straight and clean cut.

A cutter: With it we will cut the overlap so that no joint will be seen.

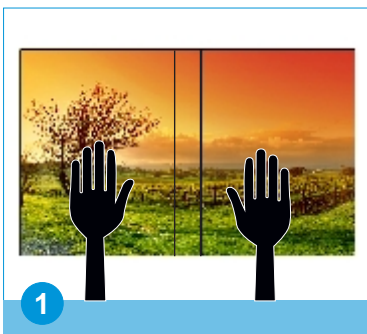

Ruler

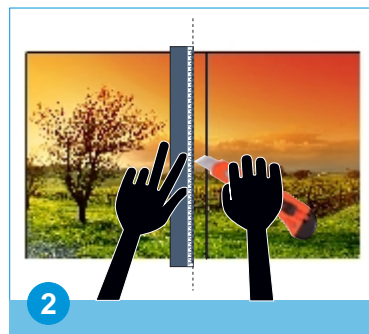

Cutter

General extraction of the overlap of the photomurals

 We advise you to be present during all the process of placement and to read well the instructions of the overlap of the murals before beginning with it.

1
Incollare il fotomurale: Follow all the steps of the instructions carefully, overlapping all the parts correctly.

2
Cut the overlap: With the help of a ruler and a cutter cut right in the middle of the overlap. Be always carefully not to damage the surface where it is placed.

3
Remove the first part of the overlap: Gently lift up the material that remains (half of the overlap) of the right pannel and clean immediately the surface so that the glue doesn't dry and form particles that can damage the mural when trying to remove them.

4
Remove the other half of the overlap: Lift the right rim of the left part to be able to remove the other half of the overlap. Pull carefully.

5
Join the two pieces: Stick again the left part of the photomural.

Once all is done the two pieces will fit perfectly. The joints will not be seen.

6
And now only one thing...Enjoy the enormous pleasure of having a mural in your home.

VERY IMPORTANT: YOU MUST NEVER TIGHTEN THE GLUE STICK IF IT IS DRY. THIS WILL DAMAGE TO THE PRINTED IMAGE. YOU HAVE TO REMOVE THE STICK WHILE IT IS WET.
